Sep 2021- Present
Mobile App Developer

1. I have developed a VPN app for a client using OpenVPN library in java using android studio. The VPN app establishes secured connections by encrypting data even during the usage of public networks. In this project, my work includes designing, coding, testing, in-app purchases, ad-mob integration, and publishing.
2. A cross-platform (Xamarin) app to read and display weather and news of specified locations using Rest-API.

Education

Anna University, Chennai

- Bachelor of Engineering E.C.E [2006-2010]
